Group [__] | [Department], [University] | [Date]

Account hacking is Bangladesh's most common cybercrime

21.65%

of victims had a social media or online account hacked, the #1 offence

≈59%

of cybercrime victims are women

78.78%

of victims are aged 18–30, the age group in this room

12%

of victims ever reported the crime to the police

> *"With ≈64 million Bangladeshis on Facebook, attackers no longer break into computers. They walk into accounts.*

Sources: Cyber Crime Awareness Foundation (2024), Cybercrime Trends in Bangladesh, reported by Dhaka Tribune; Statista (2025).

The charge: failing to protect the accounts of their users

THE CHARGE

That each defendant failed to adequately protect the accounts of its users in Bangladesh against cyber attacks.

HOW EVIDENCE WAS GATHERED

- Every security setting reviewed on our own accounts
- Cross-checked with official help pages and news
- 20/25 or more: adequate. Below 20: guilty on the weakest count

THE SECURITY CODE · 1–5 PER SECTION, MAX 25

Section 1 · Login protection	*Can a stolen password alone get in?*
Section 2 · Encryption by default	*Can the company read my messages?*
Section 3 · Threat alerts	*Will it warn me of an attack?*
Section 4 · Recovery safety	*Can a hacker lock me out for good?*
Section 5 · Privacy controls	*Can strangers find and reach me?*

Facebook: guilty of leaving account recovery unguarded

EVIDENCE FOR THE DEFENCE

- **A** Two-factor authentication: app, SMS or security key
- **B** Login alerts and remote log-out
- **C** Passkeys on mobile since June 2025
- **D** Profile lock hides photos from strangers
- **E** Messenger chats end-to-end encrypted by default

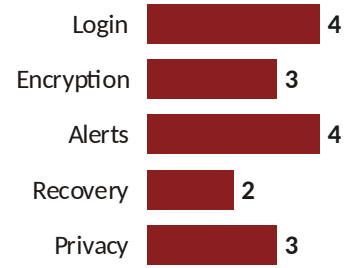

EVIDENCE FOR THE PROSECUTION

Hackers can change the recovery email and phone within minutes, and getting the account back is slow and largely automated.

VERDICT

GUILTY

16 /25

SENTENCE: COURT-ORDERED FIX

A 48-hour cool-down on recovery changes, alerts to old contacts, and Bangla-language human support.

Sources: Meta (2025); Crisan (2023).

Instagram: guilty of leaving private messages unencrypted

EVIDENCE FOR THE DEFENCE

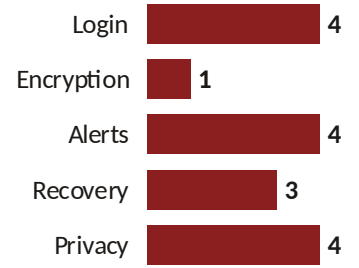

- **A** Same Meta 2FA, login alerts and login activity
- **B** “Emails from Instagram” exposes fake security emails
- **C** Restrict and Hidden Words against harassment
- **D** Teen Accounts private by default

EVIDENCE FOR THE PROSECUTION

DMs were never end-to-end encrypted by default, and Meta removed the optional encrypted chats on 8 May 2026.

VERDICT

GUILTY **16** /25

SENTENCE: COURT-ORDERED FIX

Restore end-to-end encrypted DMs as the default, and blur unsolicited explicit images for all users.

Source: Euronews (2026).

WhatsApp: not guilty, but its users are being tricked

EVIDENCE FOR THE DEFENCE

- **A** End-to-end encryption on every chat and call, by default
- **B** Six-digit two-step verification PIN
- **C** Passkey login and passkey-locked backups (Oct 2025)
- **D** Chat lock, silence unknown callers, IP protection
- **E** Strict Account Settings: one-tap lockdown (Jan 2026)

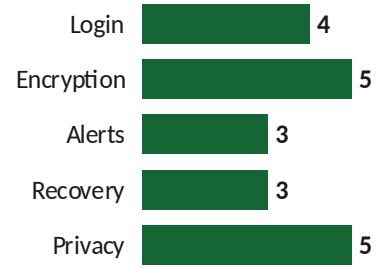

EVIDENCE FOR THE PROSECUTION

The phone number is the identity; users tricked into sharing the six-digit registration code lose their account.

VERDICT

NOT GUILTY

20 /25

COURT'S ADVICE

A Bangla warning whenever a code is requested, and a mandatory two-step PIN.

Sources: WhatsApp (2026); Help Net Security (2025).

Gmail: not guilty, and the best-guarded account on trial

EVIDENCE FOR THE DEFENCE

- **A** Passkeys as the default sign-in since Oct 2023
- **B** 2-Step Verification and Security Checkup
- **C** Critical alerts for suspicious sign-ins
- **D** Filters block 99.9%+ of phishing and malware (Google)
- **E** Advanced Protection Program for high-risk users

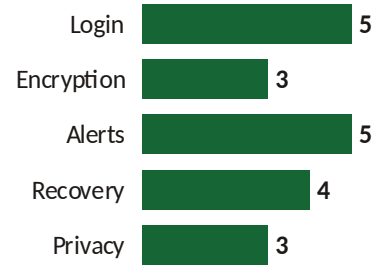

EVIDENCE FOR THE PROSECUTION

Personal Gmail is not end-to-end encrypted, and it controls password resets for every other account.

VERDICT

NOT GUILTY

20 /25

COURT'S ADVICE

Optional end-to-end encryption for personal mail, and lookalike warnings for bKash, Nagad and banks.

Sources: Google (2023); Engadget (2025).

Telegram: guilty of promising more privacy than it delivers

EVIDENCE FOR THE DEFENCE

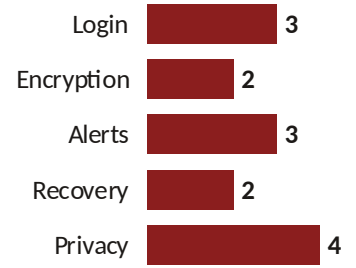

- **A** Two-step verification cloud password
- **B** Passcode lock and active-session control
- **C** Hide phone number; connect by username
- **D** Secret Chats: end-to-end encrypted, self-destructing

EVIDENCE FOR THE PROSECUTION

Ordinary chats, groups and channels are not end-to-end encrypted; since Sept 2024, IPs and phone numbers can be shared on valid legal request.

VERDICT

GUILTY **14** /25

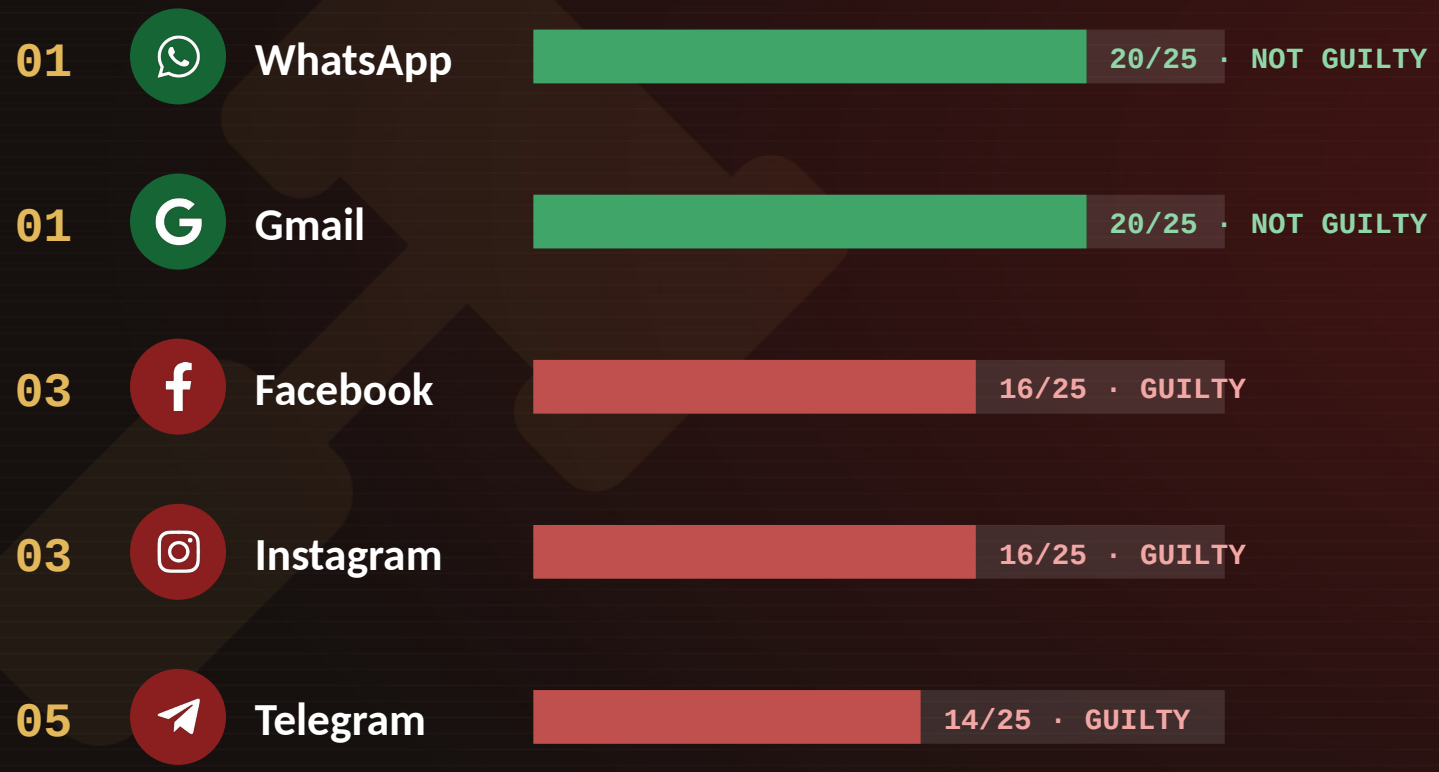

SENTENCE: COURT-ORDERED FIX

End-to-end encryption by default for one-to-one chats, and a two-step verification prompt at sign-up.

Source: Engadget (2024).

FINAL JUDGMENT · CASE NO. MCCJ-525/2026

The court finds WhatsApp the most secure for individuals

MOST SECURE: WHATSAPP

Its strongest lock, end-to-end encryption, works from installation with no setup.

GUARD IT HARDEST: GMAIL

Best login protection, and the master key to every other account.

LEAST SECURE: TELEGRAM

Its privacy reputation is stronger than its defaults.

Scores reflect the group's assessment of default and available settings, October 2026.

ORDERS OF THE COURT · EFFECTIVE TONIGHT

The most secure app is the one you set up

COURT ORDER

1

Enable two-factor authentication or a passkey on every account

COURT ORDER

2

Set a two-step verification PIN on WhatsApp

COURT ORDER

3

Never share an OTP or six-digit code with anyone

COURT ORDER

4

Confirm your recovery email and phone number

COURT ORDER

5

Log out of any device you do not recognise

Court is adjourned. *Thank you. Questions from the gallery?*
